

PROJECTS

TYPE renovation **LOCATION** cantù, italy **ARCHITECT** stefano larotonda **WITH** studio bite **FOR** ri.mi.ni srl **KEY ELEMENTS** the project concerns the transformation of a deposit into a bar. one of the main goals was to create an independent space that could also be used as unit with the disco. on the inside the spaces are generated by the paths: the main entrance functions as a distribution space whilst the bar area is developed in a longitudinal direction to connect the inner courtyard and the pedestrian zone. the walls and the ceiling are finished using opaque micaceous paints and bright resins which creates a dynamically lightened ambiance with suggestive reflections. **IMAGE CREDITS** luca santigò mora
